DIGITAL ACCESSIBILITY FOR DEVELOPERS

In order to develop more accessible digital products, website developers need to understand the Australian and International standards, Web Content Accessibility Guidelines (WCAG 2.0). This course provides practical resources and the basic knowledge required to ensure that these standards are incorporated into the website design or re-development. Participants will gain insight into the needs of people with disabilities. Technical tools and a variety of options are demonstrated and discussed through hands-on practice and group discussions.

What will be included in the session?

- ▶ Intro to Digital Accessibility
- ▶ WCAG (Web Content Accessibility Guidelines)
- ▶ Australian Requirements
- ▶ WAI- ARIA
- ▶ Accessible Code Examples
- ▶ Intro to Accessibility Tools
- ▶ Hands-on Activities & Exercises
- ▶ Individual Guided Exercises
- ▶ Explore your own agency's website
