

People don't have disabilities, they have different abilities.

Is your website accessible to all people?

- Are drop down menus, videos, controls, online forms, links, buttons, shopping carts and all other inputs functional using the keyboard only?
- · Can you see where you are at all times as you tab through a page?
- · Can you move in and out of all interactive elements easily and without getting trapped or lost?
- Is the structure of your website and page layouts logical to a new user do you go where you expect to go and find the information you are looking for?
- Are the colour schemes and visual displays appropriate for people who may be colour blind or suffer from photosensitivity?
- Is your website suitable for all devices, assistive technologies and browser combinations?

Web Key IT is a specialist digital accessibility consultancy. We provide advice and support to ensure your online content is accessible to all users, whatever their age or ability.

SOME SIMPLE TIPS TO MAKE YOUR WEBSITE MORE ACCESSIBLE

Designing for web accessibility

- Provide sufficient contrast between foreground and background
- Don't use colour alone to convey information
- Ensure that interactive elements are easy to identify
- Provide clear and consistent navigation options
- Ensure that form elements include clearly associated labels
- Provide easily identifiable feedback
- Use headings and spacing to group related content
- Create designs for different viewport sizes
- Include image and media alternatives in your design
- Provide controls for content that starts automatically

Writing for web accessibility

- Provide informative, unique page titles
- Use headings to convey meaning and structure
- Make link text meaningful
- Write meaningful text alternatives for images
- Create transcripts and captions for multimedia
- Provide clear instructions
- Keep content clear and concise

Developing for web accessibility

- Associate a label with every form control
- Include alternative text for images
- Identify page language and language changes
- Use mark-up to convey meaning and structure
- Help users avoid and correct mistakes
- Reflect the reading order in the code order
- Write code that adapts to the user's technology
- Provide meaning for non-standard interactive elements
- Ensure that all interactive elements are keyboard accessible
- Avoid CAPTCHA where possible
